## Objective

Junior/Trainee QA Engineer

## Summary

I always strive to learn new information about testing, I easily find common language with other people. I'm ready to work hard to achieve better results.

## Skills

- Functionality testing;
- Testing documentation;
- Test planning;
- Understanding of Agile software development methodologies (Scrum, Kanban)
- Knowledge of client-server apps work principles;
- Test-case, check-list ([examples](#));
- Bug reporting;
- Web, mobile and desktop(console) testing;
- DevTools;
- API testing;
- Basic knowledge HTML;
- Basic automated testing (Selenium IDE);
- SQL, MySQL (writing basic queries);
- Tools: Postman, Jira, Fiddler, Jmeter, Android studio;
- **English:** Pre-Intermediate.

## Work experience

October 2020- January 2021 Epam UpSkill Lab

During the course, I worked together with a personal mentor. Tested a console application. Performed such tasks as: analysis of requirements, drawing up a test plan, writing test cases and check-lists, preparing bug reports, and drawing up a test result report.

## Education

**October 2020** – January 2021 *Epam Upskill Lab*
